Care New England Health System has an important and proactive role in helping shape the future of health care for the communities we serve. With a dual emphasis on driving and implementing the latest advances in medical research while attracting the nation's top clinicians, CNE is committed to offering access to high-quality, innovative programs and services while engaging in important discussions all of us should be having about our health.

Backed by a broad range of care—primary care, surgery, cardiovascular care, oncology, psychiatry, behavioral health, newborn pediatrics and the full spectrum of women's health services—CNE is helping to reinvent the way health care is delivered, partnering with our patients to provide the best care possible while working to create a community of healthier people.

Care New England Medical Group was established in 2016 to bring together Care New England's health care providers to collaboratively deliver high-value care. Governed by providers, the multi-specialty group is focused on increased access to patient-centric services to improve the overall health of the community we serve.

Butler Hospital is a major brain and behavioral health research and teaching hospital for psychiatric, addiction, movement and memory disorders. As Rhode Island's only private, nonprofit psychiatric and substance use hospital serving adolescents, young adults, adults and seniors, Butler is focused on advancing the understanding of brainbased illnesses and providing innovative treatments to improve the lives of people who suffer from them. Worldwide, Butler is recognized as a pioneer in conducting cutting edge research and educating the next generation of physicians as the major affiliated teaching hospital for psychiatry and behavioral health at The Warren Alpert Medical School of Brown University.

Kent Hospital, the second largest hospital in Rhode Island and a Designated Baby-Friendly® USA hospital, provides the spectrum of primary and acute care services, including cardiology enhanced by a clinical affiliation with Brigham and Women's Hospital; weight loss surgery program; emergency department with rapid assessment and virtually no wait; Breast Health Center at Kent, a collaboration with Women & Infants; Inpatient Rehabilitation Center, the state's only 24-hour emergency hyperbaric oxygen facility; Stroke Center; Women's Care Center; and an ambulatory surgery center. Kent is an affiliate of the University of New England College of Osteopathic Medicine for medical education.

Memorial Hospital is a major teaching affiliate of The Warren Alpert Medical School of Brown University and a site for the medical school's family and internal medicine academic programs. Memorial provides a variety of outpatient health services for the people of northern Rhode Island and southeastern Massachusetts, including oncology, cardiology services enhanced by a clinical affiliation with Brigham and Women's hospital, rehabilitation, pain management, pediatric neurodevelopmental, orthopedics, and diagnostics. In addition, the hospital offers a fully staffed emergency department with behavioral health support.

Women & Infants is the region's premier hospital for women and newborn children. A major teaching affiliate of The Warren Alpert Medical School of Brown University, it is the nation's 12th largest stand-alone obstetrical service and the largest in New England with approximately 8,500 deliveries per year. A Designated Baby-Friendly® USA hospital, *U.S. News & World Report* 2014-15 Best Children's Hospital in Neonatology an a 2014 Leapfrog Top Hospital, in 2009 Women & Infants opened what was at the time the country's largest single-family room neonatal intensive care unit.

VNA of Care New England provides a broad spectrum of home health, hospice and private duty nursing services for new mothers, the elderly and the terminally ill. A trusted community resource, VNA offers bereavement support groups, health screenings and community education sessions in an effort to maintain healthy communities.

Care New England Wellness Center combines hospital expertise with personalized guidance to offer an array of wellness, nutrition, fitness and educational programs for people of all ages. Personalized wellness programs that include nutrition counseling and supervised fitness plans are created to help manage medical issues such as diabetes and heart disease.

The Providence Center is at the forefront of innovative approaches to community-based behavioral health care designed to meet the changing needs of the more than 15,000 Rhode Islanders it serves each year. TPC provides more than 60 programs and wraparound services, including food and housing, job training, legal services, primary care and wellness activities.
