## Sadness, Support and, Finally, Sydney

Danielle and her husband were healthy, active and had no known fertility problems but over the course of four years, the couple suffered five devastating miscarriages. Small changes under the direction of Women & Infants' Fertility Center had a huge effect on the couple's fertility journey.

Overcoming five miscarriages

## Unexplained Infertility

What do you do when all the tests are normal, but you still are not pregnant? Dr. Wheeler explains what this confusing diagnosis really means and treatment options on our latest blog.

## Necessary Introduction

1 in 8 couples will experience infertility at some point in their lives. Dr. Victoria Snegovskikh defines infertility and offers information about who may be most impacted by fertility issues.
